Discharge Permit Summary

#### I. INTRODUCTION

The New Mexico Environment Department (NMED) issues this groundwater discharge permit Renewal and Modification (Discharge Permit or DP-421) to the New Mexico Tech (NMT) – Energetic Materials Research and Testing Center (EMRTC or Permittee) pursuant to the New Mexico Water Quality Act (WQA), NMSA 1978 §§74-6-1 through 74-6-17, and the New Mexico Water Quality Control Commission (WQCC) Ground and Surface Water Protection Regulations, 20.6.2 NMAC.

NMED's purpose in issuing this Discharge Permit, and in imposing the requirements and conditions specified herein, is to control the discharge of water contaminants from EMRTC (Facility) in order to protect groundwater and those segments of surface water gaining from groundwater inflow for present and potential future use as domestic and agricultural water supply and other uses, and to protect public health. It is NMED's determination in issuing this Discharge Permit that the Permittee has met the requirements of Subsection C of 20.6.2.3109 NMAC. The Permittee is responsible for complying with the terms and conditions of this Discharge Permit pursuant to Section 20.6.2.3104 NMAC; failure to do so may result in enforcement action by NMED (20.6.2.1220 NMAC).

Described below are the activities that produce the discharge, the location of the discharge, and the quantity, quality and flow characteristics.

The Permittee discharges industrial wastewater from the Torres Laboratory at a volume of up to 700 gallons per day (gpd) to a concrete-lined impoundment equipped with a secondary synthetic liner and leak detection for disposal by evaporation, i.e., the industrial wastewater impoundment.

In addition, nine septic tanks located throughout the Facility receive and treat domestic wastewater at a volume of up to 400 gpd. Treated wastewater discharges from the nine septic tanks to nine corresponding leachfields.

The Discharge Permit modification consists of an increase in the maximum daily domestic wastewater discharge volume to the leachfields from 250 to 400 gpd.

The discharge may contain water contaminants or toxic pollutants elevated above the standards of Section 20.6.2.3103 NMAC and is not subject to the exemption at Subsection 20.6.2.3105. A NMAC.

The Facility is located at 1001 South Road, approximately three miles west of Socorro, in Section 33, Township 02S, Range 01W, Section 36, Township 02S, Range 02W, Sections 8 and 9, Township 03S, Range 01W, and Sections 1, 2, and 6, Township 03S, Range 02W, in Socorro County. A discharge at the Facility is most likely to affect groundwater at a depth of approximately 60-217

feet and having a pre-discharge total dissolved solids (TDS) concentration of approximately 1,450 milligrams per liter.

NMED issued the original Discharge Permit to the Permittee on December 22, 1986 and subsequently renewed the Permit on May 15, 1992, May 22, 1997, September 17, 2003, and May 14, 2010. NMED issued the preceding renewal Discharge Permit on June 30, 2015. The application (i.e., discharge plan) associated with this Discharge Permit consists of the materials submitted by the Permittee dated May 28, 2020, and materials contained in the administrative record prior to issuance of this Discharge Permit. The Permittee shall manage the discharge in accordance with all conditions and requirements of this Discharge Permit.

NMED reserves the right to require a Discharge Permit modification in the event NMED determines that the Permittee is or may be violating, or is likely to violate in the future, the requirements of 20.6.2 NMAC or the standards of Section 20.6.2.3103 NMAC. NMED reserves this right pursuant to Section 20.6.2.3109 NMAC. An NMED requirement to modify the Discharge Permit may result from a determination by NMED that structural controls and/or management practices approved under this Discharge Permit are insufficiently protective of groundwater quality and human health. NMED reserves the right to require the Permittee implement abatement of water pollution and remediate groundwater quality.

NMED's issuance of this Discharge Permit does not relieve the Permittee of the responsibility to comply with the WQA, WQCC Regulations, and any other applicable federal, state and/or local laws and regulations, such as zoning requirements and nuisance ordinances.

This Discharge Permit may use the following acronyms and abbreviations.

Abbreviation	Explanation	Abbreviation	Explanation

### II. FINDINGS

In issuing this Discharge Permit, NMED finds the following.

- The Permittee is discharging effluent or leachate from the Facility so that such effluent or leachate may move into groundwater of the State of New Mexico that has an existing concentration of 10,000 mg/L or less of TDS, within the meaning of Subsection A of 20.6.2.3101 NMAC, without exceeding standards of 20.6.2.3103 NMAC for any water contaminant.
- 2. This Discharge Permit allows the Permittee to discharge effluent or leachate from the Facility directly or indirectly into groundwater pursuant to this Discharge Permit and Sections 20.6.2.3000 through 20.6.2.3114 NMAC.
- 3. The discharge from the Facility is not subject to any of the exemptions of Section 20.6.2.3105 NMAC.

#### III. AUTHORIZATION TO DISCHARGE

The Permittee is responsible for ensuring that discharges authorized by this Discharge Permit are consistent with the terms and conditions herein pursuant to 20.6.2.3104 NMAC.

This Discharge Permit authorizes the Permittee to discharge up to 700 gpd of industrial wastewater from the Torres Laboratory to a concrete-lined impoundment equipped with a secondary synthetic liner and leak detection, i.e., the industrial wastewater impoundment, for disposal by evaporation.

This Discharge Permit authorizes the Permittee is to receive and treat up to 400 gpd of domestic wastewater using nine septic tanks located throughout the Facility. The Permittee is authorized to discharge treated wastewater to nine corresponding leachfields.

[20.6.2.3104 NMAC, Subsection C of 20.6.2.3106 NMAC, Subsection D of 20.6.2.3109 NMAC]

#### IV. CONDITIONS

NMED issues this Discharge Permit for the discharge of water contaminants subject to the following conditions.

### A. OPERATIONAL PLAN

#	Terms and Conditions
1.	The Permittee shall implement the following operational plan to ensure compliance with Title 20, Chapter 6, Parts 2 and 4 NMAC.
	[Subsection C of 20.6.2.3109 NMAC]
2.	The Permittee shall operate in a manner that does not violate standards and requirements of Sections 20.6.2.3101 and 20.6.2.3103 NMAC.
	[20.6.2.3101 NMAC, 20.6.2.3103 NMAC, Subsection C of 20.6.2.3109 NMAC]

## **Operating Conditions**

#	Terms and Conditions
3.	The Permittee shall maintain a secure fencing cover above the industrial wastewater impoundment to restrict access by the general public and animals. The cover shall be constructed in a manner which prevents access by the general public to the water in the impoundment. The Permittee shall maintain the fence cover to serve the stated purpose throughout the term of this Discharge Permit.  [Subsections B and C of 20.6.2.3109 NMAC, NMSA 1978, § 74-6-5.D]
4.	The Permittee shall maintain signs indicating that the wastewater in the industrial wastewater impoundment is not potable. The Permittee shall post signs at areas where there is potential for public contact with wastewater. The signs shall be printed in English and Spanish and shall remain visible and legible for the term of this Discharge Permit.  [Subsections B and C of 20.6.2.3109 NMAC, NMSA 1978, § 74-6-5.D]
5.	The Permittee shall maintain the industrial wastewater impoundment and secondary liner to avoid conditions that could affect the structural integrity of the impoundment or the liner. Characterization of such conditions may include the following:  • erosion damage;  • animal burrows or other damage;  • the presence of vegetation including aquatic plants, weeds, woody shrubs or trees growing within five feet of the top inside edge of a sub-grade impoundment, within five feet of the toe of the outside concrete pad of the above-grade impoundment, or within the impoundment itself;

- the presence of large debris or large quantities of debris in the impoundment;
- evidence of seepage; or
- evidence of berm or surrounding area subsidence.

The Permittee shall routinely control vegetation growing around the industrial wastewater impoundment by mechanical removal that is protective of the impoundment and secondary liner.

The Permittee shall visually inspect the industrial wastewater impoundment and surrounding areas on a monthly basis to ensure proper maintenance. In the event that an inspection reveals any evidence of damage that threatens the structural integrity of the impoundment or secondary liner, or that may result in an unauthorized discharge, the Permittee shall implement the Contingency Plan set forth in this Discharge Permit.

The Permittee shall create and maintain a log of all industrial wastewater impoundment inspections which describes the date of the inspection, any findings and repairs, and the name of the person responsible for the inspection. The Permittee shall make the log available to NMED upon request.

[Subsection A of 20.6.2.3107 NMAC, Subsection C of 20.6.2.3109 NMAC]

6. The Permittee shall preserve a minimum of two feet of freeboard in the industrial wastewater impoundment, i.e., the space between the liquid level in the impoundment and the top of the impoundment.

In the event that the Permittee determines that it cannot preserve two feet of freeboard in the impoundment, the Permittee shall implement the Contingency Plan set forth in this Discharge Permit.

[Subsection A of 20.6.2.3107 NMAC, Subsection C of 20.6.2.3109 NMAC]

7. The Permittee shall visually inspect the area above the nine leachfields (disposal systems) semi-annually to ensure proper maintenance. The Permittee shall correct any conditions that indicate damage to the disposal system. The Permittee shall ensure conditions corrected include erosion damage, animal activity/damage, woody shrubs, evidence of seepage, or any other condition indicating improper construction or damage.

The Permittee shall keep a log of the inspections that includes a date of the inspection, any findings and repairs, and the name of the inspector. The Permittee shall make the log available to NMED upon request.

#	ŧ	Terms and Conditions
		In the event of a failure of a disposal system, the Permittee shall implement the Contingency Plan set forth in this Discharge Permit.
		[Subsections A and D of 20.6.2.3107 NMAC, Subsection C of 20.6.2.3109 NMAC]
8	3.	The Permittee shall inspect the nine septic tanks semi-annually for the accumulation of scum and solids. In the event that the scum layer exceeds three inches or the settled solids occupy 30% or more of the tank volume, the contents of the tanks shall be pumped by a septage pumper meeting the qualification requirements identified in Subsection D of 20.7.3.904 NMAC, the Liquid Waste Disposal and Treatment Regulations.  The Permittee shall create and maintain a log of all septic tank inspections which
		describes the findings, repairs, the date of the inspection, and the name of the person responsible for the inspection. The Permittee shall make the log available to NMED upon request.
		The Permittee shall maintain a record of solids removal and disposal, including the date of off-site shipment, the name of the septage hauler, volume of solids removed, disposal method, and disposal location. The Permittee shall make the records available to NMED upon request.
		[Subsection A of 20.6.2.3107 NMAC, Subsect—on C of 20.6.2.3109 NMAC]
S	).	The Permittee shall inspect the industrial wastewater impoundment leak detection and recovery system on a monthly basis for the presence of liquid. If the Permittee detects liquid in the leak detection system, the Permittee shall collect a sample and analyze the sample for fluoride, Cl, NO <sub>3</sub> -N, sulfate, TDS, perchlorate, total petroleum hydrocarbons, and explosives within 30 days of discovery.
		The Permittee shall maintain a log of the leak detection system inspection which includes the date of inspection, any findings and repairs made, and the name of the person responsible for the inspecting. A copy of the inspection log, including a statement whether or not liquids were observed in the leak detection systems, shall be submitted to NMED in the semi-annual monitoring reports.
		[20.6.2.3107 NMAC]

### B. MONITORING AND REPORTING

#	Terms and Conditions
10.	The Permittee shall conduct the following monitoring, reporting, and other requirements listed below in accordance with the monitoring requirements of this Discharge Permit.
	[Subsection A of 20.6.2.3107 NMAC, Subsection C of 20.6.2.3109 NMAC]
11.	METHODOLOGY – Unless otherwise specified by this Discharge Permit, or approved in writing by NMED, the Permittee shall use sampling and analytical techniques that conform with the references listed in Subsection B of 20.6.2.3107 NMAC.  [Subsection B of 20.6.2.3107 NMAC]
12.	Semi-annual monitoring - The Permittee shall perform monitoring and other Discharge Permit required actions during the following periods and shall submit semi-annual reports to NMED by the following due dates:  January 1st through June 30th – due by August 1st; and  July 1st through December 31st – due by February 1st.  [Subsection A of 20.6.2.3107 NMAC]

# **Facility Monitoring Conditions**

#	Terms and Conditions
13.	The Permittee shall on a monthly basis estimate the volume of wastewater discharged to the industrial wastewater impoundment and to the septic tank/leachfield systems by recording meter readings for the Facility's water supply on a monthly basis and calculating the monthly and average daily usage volumes.
	To determine the discharge volume for the industrial wastewater impoundment and for each septic tank/leachfield system, the Permittee shall use the estimated monthly influent volume* (based upon meter readings) to calculate the average daily volume by the formula below.
	estimated monthly volume ÷ number of days in the month = average daily volume
	Each month, the Permittee shall make note of any significant uses of the water (e.g., irrigation, evaporative cooling or leaks) that do not contribute to the volume of wastewater discharged to the industrial wastewater impoundment and to a specific septic tank/leachfield system.

# **Terms and Conditions** The Permittee shall submit a summary of the monthly meter readings, estimated monthly and average daily influent volumes, and notes and estimated volume of significant uses to NMED in the semi-annual monitoring reports. Should more than one flow meter exist for the Facility's water supply, the Permittee shall calculate the estimated monthly volume for the Facility by adding the estimated monthly volume for each meter. This summation should be completed prior to calculating the average daily volume for the Facility. [Subsection A of 20.6.2.3107 NMAC, Subsections C and H of 20.6.2.3109 NMAC] The Permittee shall collect samples of wastewater from two active septic tanks each 14. year, rotating among active tanks 1-9 on an annual basis, and analyze the samples for: TKN TDS Cl The Permittee shall properly prepare, preserve, transport and analyze the samples in accordance with the methods authorized in this Discharge Permit. The Permittee shall submit a copy of the laboratory analytical data results, including the QA/QC summary and Chain of Custody, to NMED in the subsequent quarterly monitoring report. [Subsection A of 20.6.2.3107 NMAC, Subsections C and H of 20.6.2.3109 NMAC] 15. The Permittee shall collect a composite wastewater sample on an annual basis from from each side of the industrial wastewater impoundment. The composite sample shall consist of a minimum of six equal aliquots collected equidistantly around the entire perimeter of the impoundment and thoroughly mixed. The Permittee shall analyze the composite sample for: TKN; NO<sub>3</sub>-N; TDS; CI; Sulfate; Fluoride; Perchlorate; Total petroleum hydrocarbons [EPA Method 8015 MOD/Diesel Range]; and Explosives [EPA Method 8095]. The Permittee shall properly prepare, preserve, transport and analyze the samples in

accordance with the methods authorized in this Discharge Permit. The Permittee shall

#	Terms and Conditions
	submit a copy of the laboratory analytical data results, including the QA/QC summary and Chain of Custody, to NMED in the monitoring reports due by February $1^{\rm st}$ each year.
	[Subsection A of 20.6.2.3107 NMAC, Subsections C and H of 20.6.2.3109 NMAC]
16.	The Permittee shall submit copies of all records of solids removal and disposal to NMED in the semi-annual monitoring reports.
	[Subsection A of 20.6.2.3107 NMAC]

### C. CONTINGENCY PLAN

#	Terms and Conditions
17.	In the event that groundwater exceeds a groundwater protection standard identified in Section 20.6.2.3103 NMAC as a result of this discharge during the term of this Discharge Permit, upon closure of the Facility or during the implementation of post-closure requirements, the Permittee shall submit to NMED a Corrective Action Plan (CAP) that proposes, at a minimum, contaminant source control measures and an implementation schedule. The Permittee shall implement the CAP as approved by NMED.  The NMED may require the Permittee to abate water pollution consistent with the requirements and provisions of Section 20.6.2.4101, Section 20.6.2.4103, Subsections C and E of 20.6.2.4106, Section 20.6.2.4107, Section 20.6.2.4108 and Section 20.6.2.4112 NMAC.  [Subsection A of 20.6.2.3107 NMAC, Subsection E of 20.6.2.3109 NMAC]
18.	In the event that an inspection reveals significant damage has occurred or is likely to affect the structural integrity of the industrial wastewater impoundment or the secondary synthetic liner, or their ability to contain contaminants, the Permittee shall propose the repair or replacement by submitting a Corrective Action Plan (CAP) to NMED for approval. The Permittee shall submit the CAP to NMED within 30 days after discovery of the damage or following notification from NMED that significant damage is evident. The Permittee shall ensure the CAP includes a schedule for completion of corrective actions. The Permittee shall initiate implementation of the CAP following approval by NMED.  [Subsection A of 20.6.2.3107 NMAC, Subsection C of 20.6.2.3109 NMAC]
19.	In the event that the industrial wastewater impoundment cannot preserve a minimum of two feet of freeboard, the Permittee shall take actions to restore the required

freeboard as authorized by this Discharge Permit and all applicable local, state, and federal regulations.

In the event that two feet of freeboard cannot be restored within a period of 72 hours following discovery, the Permittee shall propose actions to restore two feet of freeboard by submitting a short-term Corrective Action Plan (CAP) to NMED for approval. Examples of short-term corrective actions include the pumping and hauling of excess wastewater from the impoundment or reducing the volume of wastewater discharged to the impoundment. The Permittee shall ensure the CAP includes a schedule for completion of corrective actions. The Permittee shall submit the CAP within 15 days following the date the Permittee or the NMED discover the exceedance. The Permittee shall implement the CAP following NMED approval.

In the event that the short-term corrective actions fail to restore two feet of freeboard, the Permittee shall submit to NMED a proposal for permanent corrective actions in a long-term CAP. The Permittee shall submit the long-term CAP within 90 days following failure of the short-term CAP. Examples corrective actions include the installation of an additional storage impoundment or a significant and permanent reduction in the volume of wastewater discharged to the impoundment. The Permittee shall ensure the long-term CAP includes a schedule for completion of corrective actions. The Permittee shall implement the CAP following NMED approval.

[Subsection A of 20.6.2.3107 NMAC]

- 20. In the event that the Permittee identifies failure of a leachfield, such as surfacing wastewater, the Permittee shall implement the following Contingency Plan.
  - a) Within 24 hours following the discovered failure, the Permittee shall:
    - i) Notify NMED of the failure in accordance with the notification requirements described in the Contingency Plan for unauthorized discharges; and
    - ii) Restrict public access to the area.
  - b) The Permittee shall conduct a physical inspection of the treatment and disposal system to identify additional potential failures and record them in the inspection log.
  - c) The Permittee shall propose actions to address the failure and methods of correction by submitting a Corrective Action Plan (CAP) to NMED for approval within 15 days following the discovered failure. The Permittee shall ensure the CAP includes a schedule for completion of corrective actions. The Permittee shall initiate implementation of the CAP following NMED approval.

[Subsection A of 20.6.2.3107 NMAC, Subsection C of 20.6.2.3109 NMAC]

# **Terms and Conditions** 21. In the event that the laboratory analytical data results of the liquid present in the leak detection sump indicates that the chemical content of the liquid is consistent with the contents of the industrial wastewater impoundment, the Permittee shall submit a Corrective Action Plan (CAP) to NMED which evaluates the primary liner leakage rate and proposes options for stopping or reducing leakage. The Permittee shall submit the CAP to NMED for approval within 60 days of the receipt of the analytical results. [Subsection A of 20.6.2.3107 NMAC, Subsection C of 20.6.2.3109 NMAC] 22. In the event that a release occurs that is not authorized under this Discharge Permit (commonly known as a "spill"), the Permittee shall take measures to mitigate damage from the unauthorized discharge and initiate the notifications and corrective actions required in Section 20.6.2.1203 NMAC and summarized below. Within 24 hours following discovery of the unauthorized discharge, the Permittee shall verbally notify NMED and provide the following information. a) The name, address, and telephone number of the person or persons in charge of the Facility, as well as of the owner and/or operator of the Facility. b) The name and address of the Facility. c) The date, time, location, and duration of the unauthorized discharge. d) The source and cause of unauthorized discharge. e) A description of the unauthorized discharge, including its estimated chemical composition. f) The estimated volume of the unauthorized discharge. g) Any actions taken to mitigate immediate damage from the unauthorized discharge. Within one week following discovery of the unauthorized discharge, the Permittee shall submit written notification to NMED providing the information listed above and any pertinent updates. Within 15 days following discovery of the unauthorized discharge, the Permittee shall submit a Corrective Action Plan (CAP) to NMED describing any corrective actions previously taken and corrective actions to be taken relative to the unauthorized discharge. The CAP shall include the following information. a) A description of proposed actions to mitigate damage from the unauthorized discharge. b) A description of proposed actions to prevent future unauthorized discharges of this c) A schedule for completion of proposed actions.

#	Terms and Conditions
	In the event that the unauthorized discharge causes or may with reasonable probability cause water pollution in excess of the standards and requirements of Section 20.6.2.4103 NMAC, and the water pollution will not be abated within 180 days after notice is required to be given pursuant to Paragraph (1) of Subsection A of 20.6.2.1203 NMAC, NMED may require the Permittee to abate water pollution pursuant to Sections 20.6.2.4000 through 20.6.2.4115 NMAC.  The Permittee shall not construe anything in this condition as relieving them of the obligation to comply with all requirements of Section 20.6.2.1203 NMAC.  [20.6.2.1203 NMAC]
23.	In the event that NMED or the Permittee identifies any failures of the discharge plan, i.e., the application, or this Discharge Permit not specifically noted herein, NMED may require the Permittee to submit a Corrective Action Plan and a schedule for completion of corrective actions to address the failure(s). Additionally, NMED may require a discharge permit modification to achieve compliance with 20.6.2 NMAC.  [Subsection A of 20.6.2.3107 NMAC, Subsection E of 20.6.2.3109 NMAC]

### D. CLOSURE PLAN

#	Terms and Conditions
24.	The Permittee shall perform the following closure measures in the event the Facility, or a component thereof, is proposed to be permanently closed.
	Within <u>60 days</u> of ceasing to discharge to the industrial wastewater impoundment, the Permittee shall remove or plug the impoundment influent lines so that a discharge can no longer occur.
	Within <u>60 days</u> of ceasing to discharge to the industrial wastewater impoundment, the Permittee shall evaporate or drain all wastewater from the impoundment and any other associated wastewater system component and dispose of it in accordance with all local, state, and federal regulations.
	Within <u>90 days</u> of ceasing to discharge to the industrial wastewater impoundment, the Permittee shall submit a sludge removal and disposal plan to NMED for approval. The Permittee shall implement the plan within 30 days following approval by NMED. The sludge removal and disposal plan shall include the following information.

- a) The estimated volume and dry weight of sludge planned for removal and disposal, including measurements and calculations.
- b) Analytical results for samples of the sludge taken from the impoundment for the constituents listed in Condition 14 (reported in mg/kg, dry weight basis).
- c) The method of sludge *removal* from the industrial wastewater impoundment.
- d) The method of disposal for all the sludge (and its contents) removed from the impoundment(s). The method shall comply with all local, state and federal regulations. Note: A proposal that includes the surface disposal of sludge may be subject to Groundwater Discharge Permitting requirements pursuant to 20.6.2.3104 NMAC that are separate from the requirements of this Discharge Permit.
- e) A schedule for completion of sludge removal and disposal not to exceed two years from the date discharge to the industrial wastewater impoundment ceased.

Within <u>one year</u> following completion of the sludge removal and disposal, the Permittee shall complete the following closure measures.

- a) Remove all lines leading to and from the industrial wastewater impoundment, or permanently plug and abandon the lines in place.
- b) Remove or demolish any other wastewater system components and re-grade area with suitable fill to blend with surface topography, promote positive drainage and prevent ponding.
- c) Characterize, remove and dispose of all solids from the industrial wastewater impoundment in accordance with local, state, and federal regulations, and maintain a record of solids transported for off-site disposal, including the volume of solids transported and the disposal location.
- d) Remove and dispose of the concrete material from the impoundment and the secondary synthetic liner at a solid waste facility. If there is evidence of contaminated soil below the liners, assess the impact, report that assessment to NMED, and mitigate the impacts following NMED approval.
- e) Fill the impoundment with suitable fill.
- f) Re-grade the impoundment site and the locations of ancillary equipment, e.g., influent piping, to blend with surface topography, promote positive drainage and prevent ponding.

When the Permittee has met all closure and post-closure requirements and verified appropriate actions with date stamped photographic evidence or an associated NMED inspection, the Permittee may submit to NMED a written request, including photographic evidence, for termination of the Discharge Permit.

[Subsection A of 20.6.2.3107 NMAC, Subsection D of 20.6.2.4103 NMAC, 40 CFR Part 503]

# **Terms and Conditions** 25. The Permittee shall perform the following closure measures in the event the Facility, or a component of the Facility, is proposed to be permanently closed, and upon ceasing discharge. Within 90 days of ceasing discharge to the septic tank leachfield systems (or closed system components), the Permittee shall complete the following closure measures: a) Plug all lines leading to and from the closed systems so that a discharge can no longer occur. b) Wastewater, septage, and grease interceptor waste shall be pumped from the system components (e.g., septic tanks, grease trap/interceptors, lift stations, dosing chambers, distribution boxes) and it shall be contained, transported, and disposed of in accordance with all local, state, and federal regulations, including 40 CFR Part 503. The Permittee shall maintain a record of all wastes transported for off-site disposal. Within 180 days of ceasing discharge to the septic tank leachfield system(s) (or closed system components), the Permittee shall complete the following closure measures: a) Remove all lines leading to and from the closed systems or permanently plug them and abandon them in place. b) Remove or demolish all closed septic tanks, grease trap/interceptors, lift stations, dosing chambers, distribution boxes or other systems components (with the exception of leachfields) and re-grade the area with suitable fill to blend with surface topography to promote positive drainage and prevent ponding.

When the Permittee has met all closure and post-closure requirements and verified appropriate actions with date stamped photographic evidence or an associated NMED inspection, the Permittee may submit to NMED a written request, including photographic evidence, for termination of the Discharge Permit.

[Subsection A of 20.6.2.3107 NMAC, 40 CFR Part 503

### E. GENERAL TERMS AND CONDITIONS

#	Terms and Conditions
26.	RECORD KEEPING - The Permittee shall maintain a written record of the following:  • Information and data used to complete the application for this Discharge Permit;
	<ul> <li>Information, data, and documents demonstrating completion of closure activities;</li> <li>Any releases (commonly known as "spills") not authorized under this Discharge</li> </ul>
	Permit and reports submitted pursuant to 20.6.2.1203 NMAC;

# **Terms and Conditions** • The operation, maintenance, and repair of all facilities/equipment used to treat, store or dispose of wastewater; • Facility record drawings (plans and specifications) showing the actual construction of the Facility and bear the seal and signature of a licensed New Mexico professional engineer; Copies of logs, inspection reports, manifests and monitoring reports completed and/or submitted to NMED pursuant to this Discharge Permit; • The volume of wastewater or other wastes discharged pursuant to this Discharge • Groundwater quality and wastewater quality data collected pursuant to this Discharge Permit; • Copies of construction records (well log) for all sampled groundwater monitoring wells pursuant to this Discharge Permit; • The maintenance, repair, replacement or calibration of any monitoring equipment or flow measurement devices required by this Discharge Permit; and Data and information related to field measurements, sampling, and analysis conducted pursuant to this Discharge Permit, including: the dates, location and times of sampling or field measurements; o the name and job title of the individuals who performed each sample collection or field measurement; o the sample analysis date of each sample o the name and address of the laboratory, and the name of the signatory authority for the laboratory analysis; o the analytical technique or method used to analyze each sample or collect each field measurement; o the results of each analysis or field measurement, including raw data; o the results of any split, spiked, duplicate or repeat sample; and o a copy of the laboratory analysis chain-of-custody as well as a description of the quality assurance and quality control procedures used. The Permittee shall maintain the written record at a location accessible to NMED during a Facility inspection for the lifetime of the Discharge Permit. The Permittee shall make the record available to NMED upon request. [Subsections A and D of 20.6.2.3107 NMAC] 27. SUBMITTALS – The Permittee shall submit both a paper copy and an electronic copy of all notification and reporting documents required by this Discharge Permit, e.g., monitoring reports. The Permittee shall submit paper and electronic documents to the NMED Permit Contact identified on the Permit cover page.

#	Terms and Conditions
	[Subsection A of 20.6.2.3107 NMAC]
28.	INSPECTION and ENTRY – The Permittee shall allow NMED to inspect the Facility and its operations that are subject to this Discharge Permit and the WQCC regulations. NMED may upon presentation of proper credentials, enter at reasonable times upon or through any premises in which a water contaminant source is located or in which any maintained records required by this Discharge Permit, the regulations of the federal government, or the WQCC are located.
	The Permittee shall allow NMED to have access to and reproduce for their use any copy of the records, and to perform assessments, sampling or monitoring during an inspection for the purpose of evaluating compliance with this Discharge Permit and the WQCC regulations.  No person shall construe anything in this Discharge Permit as limiting in any way the inspection and entry authority of NMED under the WQA, the WQCC Regulations, or any other local, state or federal regulations.
	[Subsection D of 20.6.2.3107 NMAC, NMSA 1978, §§ 74-6-9.B and 74-6-9.E]
29.	DUTY to PROVIDE INFORMATION - The Permittee shall, upon NMED's request, allow for NMED's inspection/duplication of records required by this Discharge Permit and/or furnish to NMED copies of such records.
	[Subsection D of 20.6.2.3107 NMAC]
30.	MODIFICATIONS and/or AMENDMENTS – In the event the Permittee proposes a change to the Facility or the Facility's discharge that would result in a change in the volume discharged; the location of the discharge; or in the amount or character of water contaminants received, treated or discharged by the Facility, the Permittee shall notify NMED prior to implementing such changes. The Permittee shall obtain NMED's approval (which may require modification of this Discharge Permit) prior to implementing such changes.
	[Subsection C of 20.6.2.3107 NMAC, Subsections E and G of 20.6.2.3109 NMAC]
31.	PLANS and SPECIFICATIONS — In the event the Permittee proposes to construct a wastewater system or change a process unit of an existing system such that the quantity or quality of the discharge will change substantially from that authorized by this Discharge Permit, the Permittee shall submit construction plans and specifications of the

proposed system or process unit to NMED for approval prior to the commencement of construction.

In the event the Permittee implements changes to the wastewater system authorized by this Discharge Permit that result in only a minor effect on the character of the discharge, the Permittee shall report such changes (including the submission of record drawings where applicable) to NMED prior to implementation.

[Subsections A and C of 20.6.2.1202 NMAC, NMSA 1978, §§ 61-23-1 through 61-23-32]

CIVIL PENALTIES - Any violation of the requirements and conditions of this Discharge 32. Permit, including any failure to allow NMED staff to enter and inspect records or facilities, or any refusal or failure to provide NMED with records or information, may subject the Permittee to a civil enforcement action. Pursuant to WQA 74-6-10(A) and (B), such action may include a compliance order requiring compliance immediately or in a specified time, assessing a civil penalty, modifying or terminating the Discharge Permit, or any combination of the foregoing; or an action in district court seeking injunctive relief, civil penalties, or both. Pursuant to WQA 74-6-10(C) and 74-6-10.1, civil penalties of up to \$15,000 per day of noncompliance may be assessed for each violation of the WQA 74-6-5, the WQCC Regulations, or this Discharge Permit, and civil penalties of up to \$10,000 per day of noncompliance may be assessed for each violation of any other provision of the WQA, or any regulation, standard, or order adopted pursuant to such other provision. In any action to enforce this Discharge Permit, the Permittee waives any objection to the admissibility as evidence of any data generated pursuant to this Discharge Permit.

[20.6.2.1220 NMAC, NMSA 1978, §§ 74-6-10 and 74-6-10.1]

### 33. CRIMINAL PENALTIES – No person shall:

- Make any false material statement, representation, certification or omission of material fact in an application, record, report, plan or other document filed, submitted or maintained under the WQA;
- Falsify, tamper with or render inaccurate any monitoring device, method or record maintained under the WQA; or
- Fail to monitor, sample or report as required by a permit issued pursuant to a state or federal law or regulation.

Any person who knowingly violates or knowingly causes or allows another person to violate the requirements of this condition is guilty of a fourth-degree felony and shall be sentenced in accordance with the provisions of NMSA 1978, § 31-18-15. Any person who is convicted of a second or subsequent violation of the requirements of this condition is

Terms and Conditions
guilty of a third-degree felony and shall be sentenced in accordance with the provisions of NMSA 1978, § 31-18-15. Any person who knowingly violates the requirements of this condition or knowingly causes another person to violate the requirements of this condition and thereby causes a substantial adverse environmental impact is guilty of a third-degree felony and shall be sentenced in accordance with the provisions of NMSA 1978, § 31-18-15. Any person who knowingly violates the requirements of this condition and knows at the time of the violation that he is creating a substantial danger of death or serious bodily injury to any other person is guilty of a second degree felony and shall be sentenced in accordance with the provisions of NMSA 1978, § 31-18-15.
COMPLIANCE with OTHER LAWS - Nothing in this Discharge Permit shall be construed in any way as relieving the Permittee of the obligation to comply with any other applicable federal, state, and/or local laws, regulations, zoning requirements, nuisance ordinances, permits or orders.  [NMSA 1978, § 74-6-5.L]
RIGHT to APPEAL - The Permittee may file a petition for review before the WQCC on this Discharge Permit. Such petition shall be in writing to the WQCC within thirty days of the receipt of postal notice of this Discharge Permit and shall include a statement of the issues raised and the relief sought. Unless the Permittee files a timely petition for review, the decision of NMED shall be final and not subject to judicial review.  [20.6.2.3112 NMAC, NMSA 1978, § 74-6-5.0]
<ul> <li>TRANSFER of DISCHARGE PERMIT - Prior to the transfer of any ownership, control, or possession of this Facility or any portion thereof, the Permittee shall: <ul> <li>Notify the proposed transferee in writing of the existence of this Discharge Permit;</li> <li>Include a copy of this Discharge Permit with the notice; and</li> <li>Deliver or send by certified mail to NMED a copy of the notification and proof that the proposed transferee has received such notification.</li> </ul> </li> <li>The Permittee shall continue to be responsible for any discharge from the Facility, until both ownership and possession of the Facility have been transferred to the transferee.</li> </ul>
PERMIT FEES – The Permittee shall be aware that the payment of permit fees is due at the time of Discharge Permit approval. The Permittee may pay the permit fees in a single
occt1ack [-Caff I-FIrit I-Tr

payment or they may pay the fee in equal installments on a yearly basis over the term of the Discharge Permit. The Permittee shall remit single payments to NMED no later than 30 days after the Discharge Permit issuance date. The Permittee shall remit initial installment payments to NMED no later than 30 days after the Discharge Permit issuance date; with subsequent installment payments remitted to NMED no later than the anniversary of the Discharge Permit issuance date.

Permit fees are associated with <u>issuance</u> of this Discharge Permit. No person shall construe anything in this Discharge Permit as relieving the Permittee of the obligation to pay all permit fees assessed by NMED. A Permittee that ceases discharging or does not commence discharging from the Facility during the term of the Discharge Permit shall pay all permit fees assessed by NMED. NMED shall suspend or terminate an approved Discharge Permit if the Permittee fails to remit an installment payment by its due date.

[Subsection F of 20.6.2.3114 NMAC, NMSA 1978, § 74-6-5.K]
